

Activity sheet / Aktiwiteitsblad

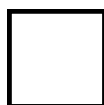

How many of these plants can you find in the garden?
Hoeveel van hierdie plante kan jy in die tuin vind?

Make a cross in the square when you spot that flower in the garden and see how many you find!

Maak 'n kruisie in die vierkant wanneer jy daardie blom in die tuin sien en kyk hoeveel jy kry!

Zantedeschia aethiopica **Arum lily (E), Varklelie (A)**

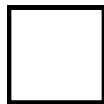

A striking wetland plant with large white spathes and glossy green leaves.

The flowers are faintly scented and attracts various crawling insects

and bees responsible for pollinating the flowers.

Bulbine frutescens **Cat's tail (E), Geelkatstert (A)**

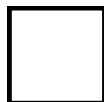

A tough, low-growing succulent with bright yellow or orange star-shaped flowers.

Its fleshy leaves release a strong herbal scent when crushed.

Artemesia afra **Wild wormwood (E), Wilde-als (A)**

A tough, low-growing succulent with bright yellow or orange star-shaped flowers.

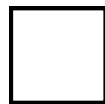

Its fleshy leaves are often used to soothe minor burns and skin irritations.

Skandeer die QR-kodes om meer te leer!

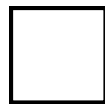

Lessertia frutescens **Cancer bush(E), Kankerbos (A)**

A well-known medicinal shrub with scarlet flowers and bitter-tasting leaves.

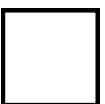

Eriocephalus africanus **Wildrosemary (E), Kapokbos(A)**

A strongly aromatic grey shrub with fluffy white seed heads. Birds use their fluffy, cottony seeds to line their nests.

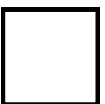

Leonotis leonurus **Lion's Ear (E), Duiwelstabak (A)**

A shrubby plant with whorls of orange flowers is used as a traditional remedy and attracts nectar-feeding birds, especially sunbirds.

Salvia aurea **Brown sage (E), Geelblomsalie (A)**

This resilient shrub with aromatic golden-green leaves and bronze, violet flowers attracts many pollinators.
